COURSE DESCRIPTION

This course explores the relationship between the design process and business model development as the two core competencies in entrepreneurship. The course also develops an understanding of innovation as a key part of the new business development process and the thought processes and heuristics that spawn the creativity for invention and innovation.

A key focus of the course will be the design process. The Stanford Design School process and a process taught by IDEO will shape the investigation and discussion. The expanding role of design firms in business activities will be another theme developed. This article by Roger Martin, Dean of the Rotman School of Management, explains the point further.

The students will present most of the books and readings in this seminar for group discussion. The students will be required to develop their understanding of the course topics more independently than in other classes.

The course project which takes the place of the final exam is to present a new business concept assigned by the professor. If the concept is for a social entrepreneurship venture, then each student team will be eligible to be selected to represent FIU in the annual Hult Prize http://www.hultprize.org. Students will hand in a short weekly report demonstrating how they are using design thinking to develop their business concept.
